

VeroTen

Sustainable and eco-friendly
Tencel+EcoVero™ fabrics

In its commitment to innovation and ecology,
Santanderina presents **VEROTEN**, fabrics made with
TENCEL and the new eco-responsible
fiber **ECOVERO™**.

Santanderina is one of the exclusive lenzing
partners in **ECOVERO™** distribution chain.
This co-operation is a guarantee of quality,
traceability and transparency.

THE PERFECT ECOLOGICAL COMBINATION
BETWEEN TENCEL&ECOVERO™

VeroTen

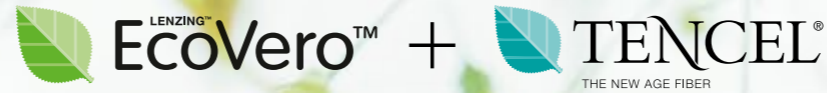

VerotEn

Tencel and EcoVero™
new eco-challenge

VEROTEN is a textile solution that combines **TENCEL** (pure and its blends) with **ECOVERO™**, the most sustainable viscose in the market with the lowest environmental impact.

Green luxury combination

ECOVERO™ is a sustainable fiber based on three pillars:

- Use of certified and controlled sustainable wood sources
- Ecological production process
- Supply chain transparency

TENCEL™ is a revolutionary natural and sustainable fiber:

- Use of controlled eucalyptus wood sources
- Ecological production
- Supply chain transparency

Natural and renewable raw material

Lower CO₂ emissions

Lower water and energy consumption

100% supply chain transparency

Responsible manufacturing based on green processes

Wood from sustainable forestry [EcoVero] and eucalyptus wood [Tencel]

Eco-responsible production processes

Less water in the process

Less energy in the process

Ecological dyes
