

FASTCEL finish

TENCEL[®] FABRICS WITH AN EXCLUSIVE
SPINNING PROCESS BY TS

FASTCEL finish

Textil Santanderina, in its commitment to both innovation and ecologically sustainable fabrics of outstanding quality, has created FASTCEL FINISH.

The new FASTCEL Tencel® range has been developed with an exclusive spinning process created by Textil Santanderina. This innovative process, more sustainable and eco-friendly, avoids the fibrillation of fabric before enzyme wash [reduced to 20-30 minutes only and softener], saving time during washing process and increasing the fabric characteristics.

This finishing offers better color effects and endless possibilities in garments.

TENCEL® FABRICS WITH AN EXCLUSIVE SPINNING PROCESS BY TS

MORE SUSTAINABLE AND ECO-FRIENDLY:
energy and water saving

HIGHER RESISTANCE OF FABRICS:
less damage during the garment wash process

BETTER COLOR FASTNESS:
cleaner washed-down effect
