# SKIN SOLATION

## FABRICS FOR YEAR-ROUND USE

Fashionwear is rarely made to handle temperature changes. That's why we often end up putting on and taking off layers of clothes throughout the day. This can be annoying for someone who lives in a changeable climate with temperature rises and falls.

SKIN SOLATION is a smart fabric finish that balances out the passive effect of fabric protection with the active effect of heat transfer.

## BREATHE EASY

- **Season-free feeling**
- **Temperature-balancing**
- **Enhanced body comfort**
- **Breathable**
- **Natural look & feel**

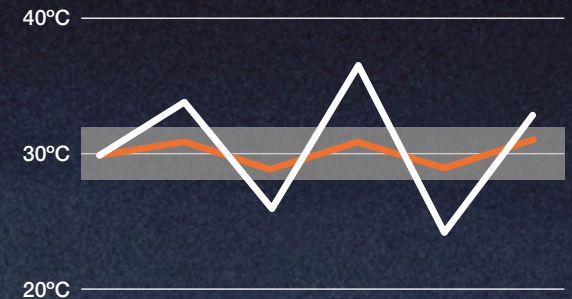

LET YOUR SKIN BREATHE SO THAT YOU CAN BREATHE EASY WITH OUR TEMPERATURE-BALANCING FABRICS

## HOW IT WORKS

SKIN SOLATION is a temperature-balancing finish that holds the temperature of the fabric for longer, which means our skin can breathe comfortably and keep our body within a human thermal comfort range whatever the external conditions may be.

With Skin Solation

Without Skin Solation  
Human Comfort Zone

Thanks to PCM reactive microcapsules, our fabrics hold onto and regulate body temperature for longer than other fabrics.
